

BATTERIES

CONTAINS

- (1) Battery Container
- (1) InnerPak (Plastic Bag)
- (1) FedEx Shipping Label (Attached to Container)
- Instructions

1

Container

Open **InnerPak** liner and place into container. Fill out the **Accumulation Start Date**.

2

Waste

Fill container completely. Secure **InnerPak** liner & attach **Self-Sealing Lid**.

3

Call FedEx

Call **1.800.GoFedEx** or **888.777.6040** for pick-up.

4

Certificate

Once your waste is received and recycled. A **Certificate of Recycling** is issued.

BATTERY TYPES

- **All chemistry types including:**
Lead Acid, Alkaline, Nickel Cadmium (NiCad), Zinc-Carbon (Zn), Rechargeable Lithium-ion (Li-Ion), Lithium (Primary), Nickel-Metal Hydride (NiMH), Mercury, Silver-Oxide, Zinc Air, etc.

UNACCEPTED

- Cracked or Leaking Batteries.
- Container Cannot Exceed 70 lbs.

TAPE BATTERY TERMINALS

There is one easy, but critical step prior to depositing batteries into the recycling containers. To prevent short circuit and possible fire, ensure the terminals cannot come into contact with other terminals, batteries, or metal objects by placing clear tape over the battery terminals, using the original battery packaging, or individually bagging each battery.

Additionally, alkaline batteries do not require battery terminal protection, so you can deposit these batteries "as-is" in the proper NLR collection container.
