E-WASTE

UNIVERSAL WASTE HANDLING PROCEDURES

40 CFR Part 273

Regulatory requirements differ from small to large quantity handlers of universal waste, but in any case, handlers of universal waste must be trained in UWM (universal waste management).

*This information is intended to be a brief overview of the regulations for managing "Universal Wastes". It is not a complete guide, additional regulations may apply. Review **40 CFR Part 273**, and your state regulations, for all applicable requirements.*

STEPS 1-5 MUST BE COMPLETED BEFORE PICKUP OR SHIPPING.

1. **Containers**
   Use the proper container for your waste outlined below.
2. **Labeling**
   All containers MUST BE labeled when stored.
3. **Accumulation Date**
   Labels MUST HAVE accumulation date completed. *(The date you started filling the container)*
4. **Waste Types**
   Waste in a container MUST NOT be commingled with other non CED's (covered electronic device).
5. **Closed & Secured**
   Containers MUST BE properly sealed and **kept in a cool dry location.**

UNACCEPTABLE PACKING.

Avoid extra charges or a delay in pickup or shipping.

- **Damaged Containers**
  Water damage, ripped, broken, or punctured containers are prohibited.
- **Off-Spec Waste Items**
  Trash, cardboard, plastic bags, and other off-spec waste items are prohibited.
- **White Goods**
  Large electrical goods used domestically such as refrigerators and washing machines.
- **Broken or Leaking Waste**
  We CANNOT accept waste items that are broken or leaking.
- **Storage Limit**
  DO NOT store waste over a 1 year period. Universal waste has a 1 year storage limit.

EWASTE TYPES
